**BAKERY**  
SYSTEMS™

**Committed to:**

**Craftsmanship, Customization,  
Innovation, & Customer Service**

**SCAN TO LEARN MORE**

## CBF Bakery Systems

**Our mission is to design and manufacture innovative solutions that provide our customers with a product and service unparalleled in our industry.**

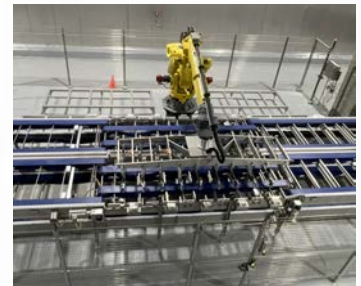

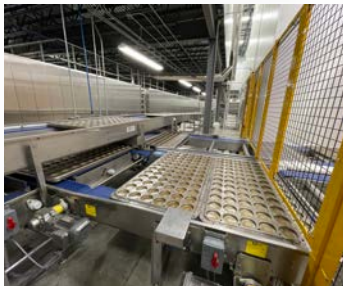

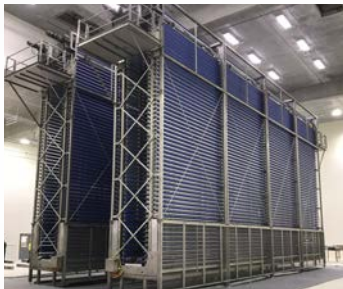

CBF Bakery Systems specializes in designing, integrating, and manufacturing a comprehensive range of customizable pan and product handling systems for complete bakery production lines.

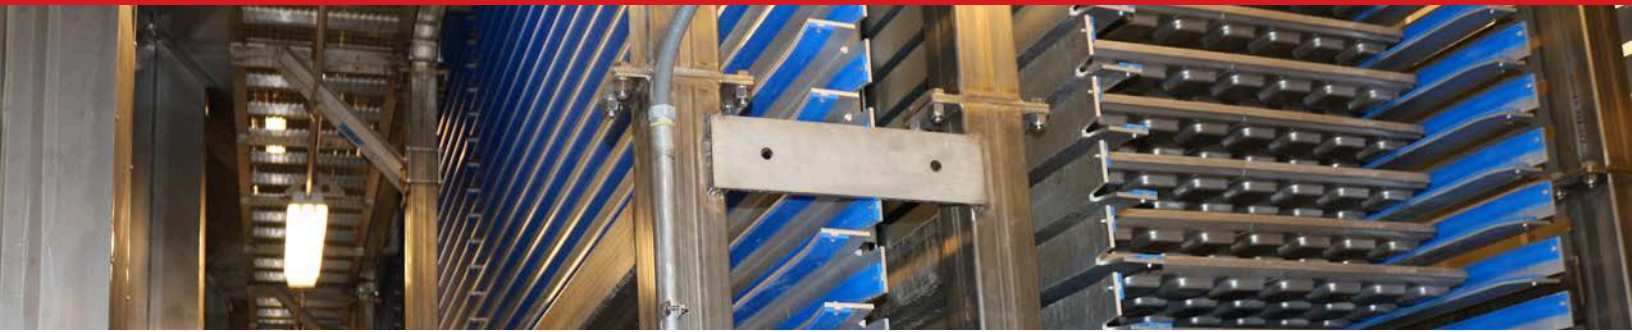

We are your trusted partner—from concept through installation—combining data-driven engineering, deep industry experience, and tailored system design to meet your exact production goals.

No matter what products you make, we can develop a solution that meets your requirements — whether that means delivering an individual piece of equipment or designing and integrating a complete production line.

### Our solutions cater to a variety of products, including:

- Artisan Breads
- Bagels, Biscuits
- Bread, Rolls
- Cakes, Cheesecakes
- Muffins, Cupcakes
- Bars, Brownies
- Croissants, Cookies
- Flatbread, Tortillas
- Filled Sandwiches
- Pies
- Pizza
- Pastries
- Sweet Goods
- Pet Foods
- Specialty items
- & Many More!

## Equipment Overview

Count on us for innovative products and expert guidance that will make your production process more efficient and cost-effective.

### Conveyor Systems (Customizable)

- Basket, Box, Bucket, Case, Dough, Lid, Pan, Peel Board, Product, Scrap, Tray, & many more!

### Depanning Systems

- Inline
- Modular (Head, Conveyor, Blower)
- Flip / Slap
- Rotary / Overturn
- Scrabble
- Pick & Place (Single / Dual / Quad Head)
  - Articulating Robot / Gantry-Based

### Oven Loading Systems

- Hearth / Scrabble
- Overhead 45° High-Speed
- Overhead Bar (Single / Dual / Quad)
- Pre-Loaders
- Reciprocator

### Oven Unloading Systems

- Hearth
- Overhead Bar (Single / Dual / Quad)
- Pre-Unloaders
- Reciprocator

### SmartStep™ Systems

- Accumulation / Storage / Retrieval
- Cooling / Proofing
- Elevators / Lowerators
- Retarding / Resting

### Spiral Conveyor Systems

- CamEdge Direct Drive Spiral

### Storage & Retrieval Systems

- Articulating Robot
- Gantry-Based
- End-of-Arm Tooling
  - (Mechanical / Magnetic / Pneumatic)

## Comprehensive Services

**We provide the technical strength of a global leader combined with the energy, flexibility, and craftsmanship of a family business.**

From our state-of-the-art facility in **York, Pennsylvania**, we fulfill a variety of customer needs, including:

- System Integration
- Plant Layout Design
- Project Engineering
- Mechanical Engineering
- Electrical Engineering
- Programming
- Fabrication Services
- Equipment Assembly
- Equipment Testing
- Installation Services
- Commissioning Services
- Training Support
- Remote Diagnostics & Support
- Spare Parts Service
- Preventive Maintenance Programs

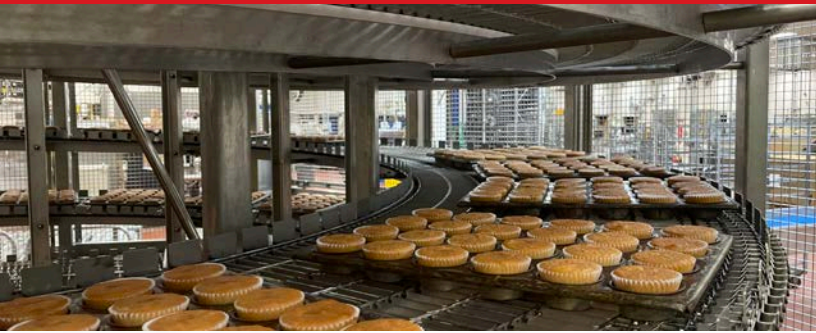

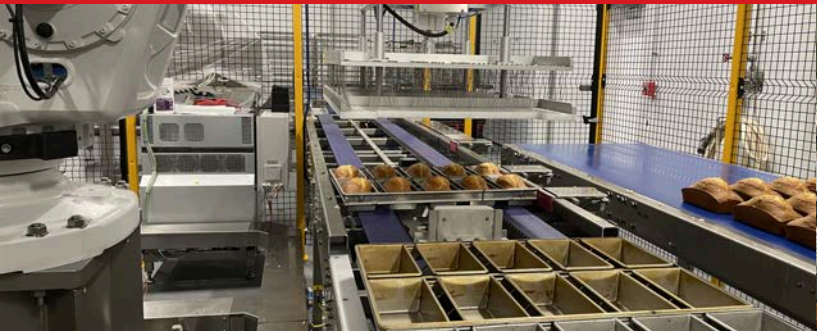

## Service Department

Our expert technicians provide complete support—ranging from training and installation to ongoing maintenance and emergency repairs — ensuring minimal downtime and optimal performance. On-site service is available at your convenience, with a focus on fast, efficient solutions to keep your equipment running at peak performance.

## Parts Department

We offer full support for sourcing spare parts, including detailed digital drawings and comprehensive maintenance manuals. Whether sourcing locally or through CBF Bakery Systems, we assist with setup and management of your parts inventory to ensure you're always prepared.

## Manufacturing Capabilities

### One-Stop Shop for Manufacturing

At CBF Bakery Systems, we take pride in being your trusted partner for precision manufacturing. By combining expert craftsmanship with advanced technology, we build equipment that meets your exact specifications and performance standards.

Each system is carefully assembled, wired, and thoroughly tested by our skilled team to ensure quality, reliability, and consistency.

With extensive expertise in machining, welding, and metal forming—alongside automated processes—we maintain tight tolerances, reduce lead times, and uphold the highest quality standards.

## Made in the USA

Our 80,000 sq. ft. facility in **York, Pennsylvania** is equipped to handle even the most complex manufacturing challenges, featuring:

- 4000-Watt Laser Cutting System
- 240-Ton Press Brakes
- CNC Machining Centers
- CNC Lathes & Vertical Milling Machines
- Overhead Crane Capabilities
- Computer-Aided Manufacturing (CAM) Technology

## Engineering Capabilities

### Unlocking Engineering Excellence

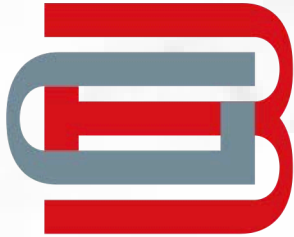

At CBF Bakery Systems, we deliver custom-engineered solutions tailored to your unique production goals.

From concept to completion, we work closely with you to understand your objectives, challenges, and environment—designing equipment that precisely aligns with your vision and operational needs.

Using your input, our design engineers employ advanced 3D software like SolidWorks®, fine-tuning every detail to meet your specific requirements with a client-centered and data-driven approach.

- Collaboration as a Core Principle
- Customizable, Data-Driven Solutions
- Specialization in Turnkey Solutions
- Complete System Design & Integration Capabilities
